Summary:

Experienced Python, Fullstack developer adept in data manipulation, analysis, and automation. Proficient in software development. Passionate about technology innovation and problem-solving.

Skills:

Technical Skills:

- Python
- Java
- GenAi
- Blockchain
- React js
- AWS
- SQL
- Web Development

Soft Skills:

- Team work
- Problem Solving
- Leadership
- Decision making

Education:

MLV textile and Engineering college Bhilwara, RJ   August,2020 – August,2024
Bachelor of Technology, Information Technology   CGPA : 8.41

Experience:

Data Science Intern: May,2023 – August,2023

Celebal Technologies:

- Developed a machine learning model that can predict air quality in urban areas and created a website using Flask Allowing users to access real time air quality predictions for desired locations.

- Developed a machine learning model that can classify toxic comment on social media using NLP and Deep learning to accurately identify and flag offensive content.

Data Science Intern: May,2023 – July,2023

Learngrowmore :

- Developed a machine learning model for the Stock Market Analysis, analyse the risk of the stock , predicting future stock prices through a Long Short Term Memory (LSTM) method!

Achievements:

- HackerRank
- Leetcode
- AWS

Projects:

- **Project 1: ” Ai Nexus”:** Crafting cutting-edge AI SaaS Platform with Next.js 13 App Router, delivering five powerful AI tools for seamless user experience.

- **Project 2: "MovieReco":** Movie Recommendation Engine. Developed MovieReco, a movie recommendation engine using content-based filtering techniques. Leveraged movie attributes like genre, director, and actors for personalised movie recommendations. Implemented NLP and cosine similarity algorithms for accurate and tailored suggestions.

- **Project 3: "Shopy":** It's Myntra Clone project aims to replicate Myntra's core functionalities. It's a full-stack web development project creating a user-friendly online fashion retail platform for browsing, searching, and purchasing clothing and accessories.
